DETAILED ACTION

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections under 35 U.S.C. 103(a)

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-6,11,15,18-20,22-24,26,29,30,32,39,40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hsiung et al (US 4175572; 11/27/79) and JP 58023898; 2/12/83 - on record).

Hsiung discloses a hair treatment composition comprising about 1 to about 20 % fatty alcohol (lipophilic solvent) plus 0.05 to 20 % quaternary polymer (cationic emulsifier). See abstract, column 2 lines 28-52. Hsiung teaches the addition of from about 1 to about 20% mineral oil, from about 1 to about 15% non-ionic emulsifier to his composition. See column 2 line 55- column 3 line 62. Hsiung also teaches the addition of propylene glycol (cosolvent) and petrolatum to his composition. See column 4 Examples II-IV. Hsiung does not teach the composition comprising ammonium chloride (lipophilic plant nutrient). However, JP '898 teaches a hair treatment composition comprising 0.7 to 7.0 % ammonium chloride, 0.1 to % % alcohol, 0.5-20 surfactant

(enhancing compound). See abstract. It would have been obvious to one having ordinary skill in the art to combine compositions. One would have been motivated to do this because both prior art compositions are individually taught to be used to treat hair.

Claim Objection / Allowable Subject Matter

Claims 7-10,12-14,16,17,21,25,27,28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 33-38,41-45 are allowable. The prior art does not teach or suggest instant homogeneous liquid comprising fatty acid esters.
